FPOLICY

Ist eine Fpolicy aktiv ?

```
fpolicy show
```

ggf. ausschalten

```
fpolicy disable -vserver <VSERVER> -policy-name POLICYNAME
```

Ein Event pro Protocol erstellen und kontrollieren

```
fpolicy policy event create -vserver <VSERVER> -event-name <EVENTNAME> -  
protocol <PROTOKOLL> -file-operations  
open,close,read,write,rename,rename_dir  
fpolicy policy event create -vserver <VSERVER> -event-name <EVENTNAME2> -  
protocol nfsv3 -file-operations read,write,rename,rename_dir  
fpolicy policy event create -vserver <VSERVER> -event-name <EVENTNAME3> -  
protocol nfsv4 -file-operations read,write,rename,rename_dir  
fpolicy policy event show -vserver <VSERVER>
```

Eine Policy erstellen und kontrollieren

```
fpolicy policy create -vserver <VSERVER> -policy-name <POLICYNAME> -events  
<EVENTNAME> -engine native  
fpolicy policy show
```

Einen Scope erstellen und kontrollieren

```
fpolicy policy scope create -vserver <VSERVER> -policy-name <POLICYNAME> -
